

SOLID Applications Ltd.

1st Thursday Masterclass

Training via the web

www.solidapps.co.uk

- ▶ On the first Thursday of every month, SOLID Applications Ltd host 1st Thursday, a User Development Webinar broadcast from our Oldbury, West Midlands headquarters. The aim of 1st Thursday is to further enhance the productivity of our customers by enabling the most effective use of Solid Edge, Teamcenter Express, and other Velocity Series software solutions.

1st Thursday

1st Thursday Masterclass is an educational training session covering a wide range of topics that will improve your use of Solid Edge and awareness of what's possible. The Masterclass gives you an insight into new and better ways to work with Solid Edge, Teamcenter Express, and other Velocity Series software solutions.

Utilising GoToMeeting from Citrix Online allows SOLID Applications to provide online training to customers across the country, and dramatically increases customer productivity by improving presentation and collaboration capabilities.

Previous 1st Thursday topics have included:

- **Getting More from Solid Edge File properties**
- **Structural Frame Design with Solid Edge**
- **Managing Large Assemblies**
- **Hybrid 2D-3D Assembly Design with Solid Edge**
- **Working with non-native 3D CAD data in Solid Edge - Part 1**
- **Working with non-native 3D CAD data in Solid Edge - Part 2**
- **Dynamically Configurable, Families of Assemblies**

Your Questions Answered

Q. Who is Eligible to attend?

A. All customers who have invested in additional ManEdged services from Solid Applications are eligible to attend. Approximately 1 week before the event an invite will be sent to a nominated Department Head or Power User via email.

Q. What do I need to do to participate?

A. The presentation combines two methods of communication: the Internet and the telephone. To participate in any of the presentations you will need a PC with fast (ISDN or Broadband) Internet connection and a Telephone (preferably with speaker phone capability so that multiple users can watch via a single connection)

Q. What Masterclass topics will be covered?

A. Topics will vary but will always be instructional.
